Evelyne Gluzman

Full Stack Developer

Experienced web developer specializing in Angular and Business Intelligence, known for creating interactive dashboards with Angular and SAP HANA. Skilled in data analysis, report generation, and balancing independent work with team collaboration.

Professional Experience

Full Stack Developer, Israeli Navy (June 2021 – June 2023)

- Developed interactive data visualization dashboards with Angular and SAP, transforming complex datasets into accessible, actionable insights. These dashboards not only conveyed critical information but also heightened user engagement by 700%, resulting in more informed decisions.
- Collaborated in an Agile/Scrum environment, actively contributing to project milestones and ensuring efficient teamwork.
- Demonstrated strong interpersonal and communication skills, facilitating effective collaboration within multidisciplinary teams.

Data Analyst, Israeli Navy (October 2020 – June 2021)

- Conducted the development of dashboards to enable data driven decision making.
- Introduced and implemented a new BI program to develop reports more efficiently and get maximum value while doing less, which cut down on unnecessary work by 20%.
- Contributed to the optimization of existing reports.
- Analyzed specific researches for senior managers.
- Collaborated with data scientists and data engineers.

Courses & Certifications

- Data Analyst, J6 & Cyber Defense Directorate, IDF (October 2020 - February 2021)
- Database Design, J6 & Cyber Defense Directorate, IDF (April 2022)
- Docker for the Absolute Beginner - Hands On – DevOps, Udemy (June 2024)
